Art Unit: 1653

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-4 and 10-24, drawn to human beta globin having substitution of Cys residues.  
Group 2, claim(s) 5-9, drawn to nucleic acid encoding human beta globin having substitution of Cys residues.

The inventions listed as Groups 1 and 2 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the human beta globin of Group 1, Claim 1 is not novel. See Karavitis et al. (March 2, 1997 ; Biophysical Journal 72(2 part 2) : A86) and Fronticelli et al. ( May 21, 1994; FASEB J. 8(7):A1294). Therefore, Group 1 lacks a special technical feature.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
